**Report on 2005
Defense Base Closure and
Realignment Implementation**

March 2006

Report Documentation Page			Form Approved OMB No. 0704-0188		
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

Appendix 1: Environmental Remediation

Appendix 2: Section 2907, BRAC Act of 1990

Introduction

The National Defense Authorization Act for Fiscal Year 2002 amended the Defense Base Closure and Realignment Act of 1990 (Public Law 101-510) to authorize a round of closures and realignments in 2005. The Commission forwarded its report and recommendations to the President on September 8, 2005. On September 15, 2005, the President approved the Commission's recommendations and forwarded its report to Congress. Since Congress did not enact a joint resolution of disapproval within the review period provided by the BRAC Act, on November 9, 2005, the Department became legally obligated to close and realign all installations recommended for closure and realignment in the Commission's report. In accordance with the BRAC Act, the Department will begin implementation of the recommendations within 2 years of the President's approval and complete implementation within 6 years.

This report addresses reporting requirements specified in Section 2907 of the BRAC Act, as amended by Section 2831 of the National Defense Authorization Act for Fiscal Year 2006 (P.L. 109-163).

As was the case in prior BRAC rounds, the Fiscal Year 2007 budget justification material submitted separately by the Comptroller was developed to satisfy the requirements of paragraphs (1) and (2) of Section 2907 of the BRAC Act. The DoD Component justification material provided detailed information by realignment and closure package, broken out by one-time implementation costs, anticipated revenues from land sales, and expected savings. This material provides justification for the Fiscal Year 2007 funds requested for BRAC 2005 implementation.

Section 2831 of the National Defense Authorization Act for Fiscal Year 2006 amended section 2907 by adding new reporting requirements. The amended section 2907 is provided at appendix 2. This report provides the information required by paragraphs three through seven. Specifically, this report provides:

- a description of the closure or realignment actions already carried out at each BRAC 2005 installation and the current status of the closure or realignment of the installation, including whether—
 - a redevelopment authority has been recognized by the Secretary for the installation;
 - the screening of property at the installation for other Federal use has been completed; and
 - a redevelopment plan has been agreed to by the redevelopment authority for the installation;
- a description of redevelopment plans for each BRAC 2005 installation;
- the quantity of property remaining to be disposed of at each BRAC 2005 installation as part of its closure or realignment;

- the quantity of property already disposed of at each BRAC 2005 installation;
- a list of the Federal agencies that have requested property during the screening process for each BRAC 2005 installation, including the date of transfer or anticipated transfer of the property to such agencies, the acreage involved in such transfers, and an explanation for any delays in such transfers;
- a list of known environmental remediation issues at each BRAC 2005 installation, including the acreage affected by these issues, an estimate of the cost to complete such environmental remediation, and the plans (and timelines) to address such environmental remediation; and
- an estimate of the date for the completion of all closure or realignment actions at each BRAC 2005 installation.

Because the Department is at the early stages of implementation, detailed information does not yet exist for many installations. As BRAC implementation matures, reports for future years will include more detailed information. Further, to ensure effective reporting in the future, each of Components will establish mechanisms to enable them to capture the required information for this annual reporting requirement. Finally, all data provided in this report is as of January 31, 2006.

Report Organization

Installations impacted by BRAC 2005 recommendations (including leased installations) are provided by Military Department by state, and Defense Agency. For each installation that will either close or realign the report provides individual installations summaries consisting of:

- The BRAC Commission number and title for all recommendations affecting the installation.
- A description of the closure or realignment actions completed.
- Whether a local redevelopment authority has been recognized by the Secretary of Defense.
- Whether the screening of property at the installation for other Federal Agency use has been completed. Since the screening process is not yet complete, this will be shown as “no” for each installation.
- Whether a redevelopment plan been agreed to by the redevelopment authority. There are no redevelopment plans at this point, so this will be shown as “none” for each installation.
- If a redevelopment plan does exist, its description. Since there are no redevelopment plans at this point, so this will be shown as “none” for each installation.
- The total quantity of property remaining to be disposed. This section reflects the acreage reported by the Military Departments that was being screened through a

formal "Notice of Availability" under the General Services Administration-delegated disposal authorities across the components of the Department of Defense and the Federal Government as of January 31, 2006. Once the Department determines the acreage that is "excess" to its needs, the acreage available for disposal to non-DoD interests will become the value for the "Quantity of Property to be Disposed" at each of the listed sites.

- The quantity of property already disposed. No property has been disposed at this point, so this will be shown as "none" for each installation.
- A list of the Federal Agency(s) that have requested property during the screening process, including the date of anticipated transfer, the acreage involved, and an explanation of any delays to transfer. As of 31 January 2006 Federal Agency(s) have expressed a request for property by either a Notice of Intent or a 1391 application. A Notice of Intent request is not a binding agreement and subsequent reports will reflect only GSA Form 1334/DD 1354 application request. Because the property screening is still underway, for most federal agency requests, the anticipated transfer date, the amount of property to be transferred, and the description of any anticipated delays to the transfer of property to another federal agency is listed as "TBD" and "none".
- The overall estimated completion date for all closure or realignment actions at the installation. This is the last date of the last action necessary to complete the closure or realignment. It does not include time necessary for environmental restoration or property disposal.
- If an installation has remediation issues, the installation summaries reference Appendix 1.

Environmental Remediation Issues and Cost To Complete

Appendix 1 provides the list of known environmental remediation issues at each affected installation affected by the BRAC Round 2005 actions that are part of the Defense Environmental Restoration Program (DERP) as defined by DoD's *2001 Management Guidance for the DERP*, an estimate of the cost to complete, and the plans and timelines for addressing the remediation issues. Information on acres affected by the remediation issues is listed as TBD. The Department has not historically collected acreage information because the acreage varies year to year based on site conditions, the stage of site investigation, or remedy, and is difficult to measure precisely. The Department is developing mechanisms to collect acreage information for future Section 2907 reports.

The DERP installations listed in Appendix 1 are identified according to the following BRAC action types: major closures, minor closures, and realignments. Below is a DoD level summary of the estimated cost-to-complete for the DERP sites at these installations grouped by the three categories.

BRAC Action Type Category	Cost-to-Complete (\$Millions)
Major Closures*	\$490.1
Minor Closures	\$457.2
Realignments	\$8,139.0
Total**	\$9,088.4

Source: FY05 EOY KBCRS database.

* Includes minimal legacy BRAC costs of \$8.7M at Umatilla Chemical Depot and \$0.2M at Ft. Monmouth, as well as minimal active installation DERP costs of \$1.8M at Ft. Monmouth

** Includes Cannon AFB Cost to complete of \$2.1 Million, which is a contingent closure.

The DERP cost-to-complete of the closing installations is to be funded from the BRAC account, whereas the DERP cost-to-complete for realigning installations is to be funded from the environmental restoration account for active installations. Cost-to-complete estimates are based on the best available information at the time of their development and represent bottom-up, site level aggregations. Additionally, the cost-to-complete estimates address all site level DERP requirements at the entire installation. Further, a complete reconciliation of DERP sites to specific land parcels affected by the specific BRAC actions does not yet exist within DoD. Therefore, the cost-to-complete estimates may, in some cases, reflect an overstatement of the environmental restoration costs related to a given BRAC action, particularly for partial closures and realignments that do not affect an entire installation.

Additional information in Appendix 1 includes an inventory of the specific environmental restoration sites at each DERP installation, including site type designations, cost-to-complete estimates, milestone dates for investigation completion and for having all remedies in-place or responses complete, the DERP program category (i.e., hazardous waste or munitions), DoD's relative-risk prioritization ranking, and the environmental restoration issue (i.e., groundwater contamination, soil contamination, etc.).

Alabama

Abbott USARC Tuskegee

Commission recommendation number(s): 11

Recommendation title(s): RC Transformation in Alabama

Closure or realignment actions taken as of January 31, 2006:

- Developed Business Plans to facilitate budget allocation
- Conducted Project Review Board to determine prioritization of military projects.
- Conducted BRAC Implementation Planning.

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed? No

Has a redevelopment plan been agreed to by the redevelopment authority? No

Description of redevelopment plan: None

Quantity of property remaining to be disposed: 5.69 acres

Quantity of property already disposed: None

Federal Agencies requesting property during screening process; and if applicable, the anticipated transfer date and the amount of property to be transferred:

Federal Agency	Anticipated Transfer Date	Acres to Be Transferred
TBD	TBD	TBD

Explanation for any delays in transfer of property: None

Known environmental remediation issues: See Appendix 1

Acreage affected by remediation issues: See Appendix 1

Estimated cost to complete environmental remediation: See Appendix 1

Plans and timelines to address environmental remediation: See Appendix 1

Estimated completion date for all closure or realignment actions: MAY/01/2010

Estimated cost to complete environmental remediation: See Appendix 1

Plans and timelines to address environmental remediation: See Appendix 1

Estimated completion date for all closure or realignment actions: SEP/30/2010

Naval Air Station (NAS) Oceana

Commission recommendation number(s): 193

Recommendation title(s): Naval Air Station Oceana, VA

Closure or realignment actions taken as of January 31, 2006:

- None. As specified in the Commission's recommendation, the realignment of Naval Air Station (NAS) Oceana will only occur if the Commonwealth of Virginia and the municipal governments of Virginia Beach, VA, and Chesapeake, VA, fail to take actions specified by the Commission by the end of March 2006, and if the State of Florida does take other specified actions within 6 months of Virginia's failure to act. The determination as to whether Virginia has failed to act and whether Florida has properly acted, rests with the DoD Inspector General and is not scheduled to occur until June 1, 2006, with respect to Virginia and June 1, 2007, with respect to Florida. The Department will not take any action toward the realignment of NAS Oceana until such time as that process is complete.

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Commission recommendation number(s): 98

Recommendation title(s): Great Falls International Airport Air Guard Station, MT

Closure or realignment actions taken as of January 31, 2006:

- None

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed? No

Has a redevelopment plan been agreed to by the redevelopment authority? No

Description of redevelopment plan: None

Quantity of property remaining to be disposed: None

Quantity of property already disposed: None

Federal Agencies requesting property during screening process; and if applicable, the anticipated transfer date and the amount of property to be transferred:

Federal Agency	Anticipated Transfer Date	Acres to Be Transferred
TBD	TBD	TBD

Explanation for any delays in transfer of property: None

Known environmental remediation issues: See Appendix 1

Acreage affected by remediation issues: See Appendix 1

Estimated cost to complete environmental remediation: See Appendix 1

Plans and timelines to address environmental remediation: See Appendix 1

Estimated completion date for all closure or realignment actions: Sep/15/2009

Maxwell AFB

Commission recommendation number(s): 124

Recommendation title(s): Joint Center of Excellence for Religious Training and Education

Closure or realignment actions taken as of January 31, 2006:

- Refining requirements and costs to begin implementation according to BRAC law

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed? No

Has a redevelopment plan been agreed to by the redevelopment authority? No

Description of redevelopment plan: None

Quantity of property remaining to be disposed: None

Quantity of property already disposed: None

Federal Agencies requesting property during screening process; and if applicable, the anticipated transfer date and the amount of property to be transferred:

Federal Agency	Anticipated Transfer Date	Acres to Be Transferred
TBD	TBD	TBD

Explanation for any delays in transfer of property: None

Known environmental remediation issues: See Appendix 1

Acreage affected by remediation issues: See Appendix 1

Estimated cost to complete environmental remediation: See Appendix 1

Plans and timelines to address environmental remediation: See Appendix 1

Estimated completion date for all closure or realignment actions: SEP/15/2011

Defense Contract Management Agency (DCMA)

Metro Park 3 6350 Walker Lane Alexandria, VA

Commission recommendation number(s): 133

Recommendation title(s): Co-locate Miscellaneous OSD, Defense Agency, and Field Agency Leased Locations

Closure or realignment actions taken as of January 31, 2006:

- DCMA BRAC Program Management Office continues to work with OSD BRAC, OSD Comptroller, and Department of the Army BRAC officials to determine requirements and develop effective implementation plans. Central to this effort is the development and approval of the BRAC business plan that outlines the requirements, timelines, and expectations for relocating DCMA functions from leased facilities in Northern Virginia to new construction at Ft. Lee, VA. DCMA leases at Metro Park Facilities are scheduled to expire in 2010. As such, DCMA BRAC actions are dependent upon business plan development and approval.

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed? No

Has a redevelopment plan been agreed to by the redevelopment authority? No

Defense Finance and Accounting Service (DFAS)

DFAS, San Bernardino, CA

Commission recommendation number(s): 145, 196

Recommendation title(s): Defense Finance and Accounting Service

Closure or realignment actions taken as of January 31, 2006:

- DFAS continued planning for site closure and mission realignment. DFAS conducted an All Hands briefing in December 2005 to inform employees about the BRAC closure schedule, impacts to employees, and upcoming events. Union officials for sites closing in FY06 were notified in December 2005. Voluntary Early Retirement Act (VERA) / Voluntary Separation Incentive Program (VSIP) windows and employee registration in the Priority Placement Program (PPP) were scheduled for February 2006.
- Human Resources scheduled Reduction in Force (RIF) notices to be issued in March 2006.
- An initial site survey visit was conducted in November 2005. The purpose of the survey was to develop a site profile for DFAS locations. The visit consisted of data collection for business processes, workforce size, and systems applications. This information will be used for workload and workforce transition to the enduring sites.

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed? No

Has a redevelopment plan been agreed to by the redevelopment authority? No

Defense Information Systems Agency (DISA)

1010 Gause Boulevard, Slidell, LA

Commission recommendation number(s): 140

Recommendation title(s): Consolidate Defense Information Systems Agency and Establish Joint C4ISR D & A Capability

Closure or realignment actions taken as of January 31, 2006:

- The DISA Continuity of Operations and Test Facility (DCTF) occupy 1010 Gause Blvd, Slidell, LA. DCTF employees have registered in the DoD Priority Placement Program based on the anticipated closure date of Jan 2007. DISA will reuse much of the DCTF computer hardware and furniture at DISA sites in Indianhead, MD and Fort Huachuca, AZ that will serve as relocation sites for DCTF workload. Any equipment not reutilized will be turned in to the Defense Reutilization Management Office (DRMO) for disposal. The DCTF facility is currently leased from the city of Slidell, and will be returned to Slidell when the lease terminates on 31 Mar 2007.

Defense Logistics Agency (DLA)

DDD, San Jouquin, CA (DDJC Sharpe)

Commission recommendation number(s): 175, 177

Recommendation title(s): Commodity Management Privatization;
Supply, Storage, and Distribution Management Reconfiguration

Closure or realignment actions taken as of January 31, 2006:

- BRAC recommendation #175 privatizes the supply, storage, distribution and disposal functions for compressed gases, package petroleum, oils and lubricants, and tires. In coordination with the MRPO and the Services, the Defense Supply Centers have aggressively solicited industry interest by hosting Industry Days focused on small and large business teaming arrangements. A comprehensive request for information has been issued to obtain feedback and ideas to help develop a requirement that will meet the transformational objectives outlined in the BRAC recommendations. Formal solicitations will follow. Elimination of storage requirements will take place once contracts are in place and operational.
- DLA has formed working groups with representation from all the Services to help with the Business Plan, Concept of Operations, and Implementation Planning for recommendation #177. The working groups are defining the business rules, metrics, system requirements, and finance. Site visits to several locations outlined in the 2005 Base Closure and Realignment Recommendation have also been completed.

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed? No

Has a redevelopment plan been agreed to by the redevelopment authority? No

Defense Supply Center, Columbus, OH

Commission recommendation number(s): 37, 137, 145, 175, 176, 177

Recommendation title(s): Reserve Component Transformations in Ohio; Consolidate Civilian Personnel Offices (CPOs), Defense Finance and Accounting Service; Commodity Management Privatization; Depot-Level Repairable Procurement Management Consolidation; Supply, Storage, and Distribution Management Reconfiguration

Closure or realignment actions taken as of January 31, 2006:

- Vacant, “buildable” space at DSCC has been identified for reuse by USAR in support of proposed BRAC construction (recommendation #37). DSCC will work with both the USAR and the Ohio Army National Guard to “site” projects proposed for Columbus.
- DLA has formed working groups with the Defense Commissary Agency, Washington Headquarters Services, and the Department of Defense Education

Activity to formulate the business plan and begin implementation planning for recommendation #137. These working groups are also in the process of defining the workload that will transfer. Options to reduce construction costs are currently under evaluation.

- DFAS Columbus will begin their first workload transfer of a BRAC closing site in June 2006 for recommendation # 145. Additional BRAC workload transfers will occur in FY07 and FY08. Expected completion date is 30 Sep 2008.
- BRAC recommendation #175 privatizes the supply, storage, distribution and disposal functions for compressed gases, package petroleum, oils and lubricants, and tires. In coordination with the MRPO and the Services, the Defense Supply Centers have aggressively solicited industry interest by hosting Industry Days focused on small and large business teaming arrangements. A comprehensive request for information has been issued to obtain feedback and ideas to help develop a requirement that will meet the transformational objectives outlined in the BRAC recommendations. Formal solicitations will follow. Elimination of storage requirements will take place once contracts are in place and operational.
- Recommendation #176 entails the consolidation and migration of the contracting functions for DLRs from the Services to DLA under an “as-is, where-is” concept. The Services and DLA have established a DLR Cross Service Working Group to assess the potential workload and staffing requirements. DLRs vary in a broad range of complexity which has been defined into four tiers. These tiers will be used to determine the migration schedule which in turn will define the cycle to transfer personnel. Implementation of this recommendation has minimal impact on facilities.
- DLA has formed working groups with representation from all the Services to help with the Business Plan, Concept of Operations, and Implementation Planning for recommendation #177. The working groups are defining the business rules, metrics, system requirements, and finance. Site visits to several locations outlined in the 2005 Base Closure and Realignment Recommendation have also been completed.

Estimated completion date for all closure or realignment actions: SEP/15/2011

Crystal Square 4 Arlington, VA

Commission recommendation number(s): 131, 133

Recommendation title(s): Co-locate Military Dept. Investigation Agencies with DoD Counterintelligence & Security Agency, Co-locate Miscellaneous OSD, Defense Agency and Field Agency Leased locations

Closure or realignment actions taken as of January 31, 2006:

- None

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed? No

Has a redevelopment plan been agreed to by the redevelopment authority? No

Description of redevelopment plan: None

Quantity of property remaining to be disposed: None

Quantity of property already disposed: None

Federal Agencies requesting property during screening process; and if applicable, the anticipated transfer date and the amount of property to be transferred:

Federal Agency	Anticipated Transfer Date	Acres to Be Transferred
TBD	TBD	TBD

Explanation for any delays in transfer of property: None

Known environmental remediation issues: None

Acreage affected by remediation issues: None

Estimated cost to complete environmental remediation: None

Plans and timelines to address environmental remediation: None

Estimated completion date for all closure or realignment actions: SEP/15/2011

Crystal Square 5 Arlington, VA

Commission recommendation number(s): 133

Recommendation title(s): Co-locate Miscellaneous OSD, Defense Agency and Field Agency Leased locations

Closure or realignment actions taken as of January 31, 2006:

- None

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed? No

Has a redevelopment plan been agreed to by the redevelopment authority? No

Description of redevelopment plan: None

Quantity of property remaining to be disposed: None

Quantity of property already disposed: None

Federal Agencies requesting property during screening process; and if applicable, the anticipated transfer date and the amount of property to be transferred:

Federal Agency	Anticipated Transfer Date	Acres to Be Transferred
TBD	TBD	TBD

Explanation for any delays in transfer of property: None

Known environmental remediation issues: None

Acreage affected by remediation issues: None

Estimated cost to complete environmental remediation: None

Plans and timelines to address environmental remediation: None

Estimated completion date for all closure or realignment actions: SEP/15/2011

Federal Office Building 2 Arlington, VA

Commission recommendation number(s): 129, 134, 149

Recommendation title(s): Co-locate Miscellaneous Air Force and National Guard Leased locations; Co-locate Missile and Space Defense Agencies; Relocate Miscellaneous Department of Navy Leased Locations

Closure or realignment actions taken as of January 31, 2006:

- Budget developed and business plan being prepared for submission to OSD.
- Refining requirements and costs to begin implementation according to BRAC law.

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed? No

Has a redevelopment plan been agreed to by the redevelopment authority? No

Description of redevelopment plan: None

Quantity of property remaining to be disposed: None

Quantity of property already disposed: None

Federal Agencies requesting property during screening process; and if applicable, the anticipated transfer date and the amount of property to be transferred:

Federal Agency	Anticipated Transfer Date	Acres to Be Transferred
TBD	TBD	TBD

Explanation for any delays in transfer of property: None

Known environmental remediation issues: None

Acreage affected by remediation issues: None

Estimated cost to complete environmental remediation: None

Plans and timelines to address environmental remediation: None

Estimated completion date for all closure or realignment actions: SEP/15/2011

Hoffman Building 1, Alexandria, VA

Commission recommendation number(s): 132, 133, 143, 148

Recommendation title(s): Co-locate Miscellaneous Army Leased Locations; Co-locate Miscellaneous OSD, Defense Agency and Field Agency Leased locations; Consolidate/Co-locate Active and Reserve Personnel & Recruiting Centers for Army and Air Force; Relocate Army Headquarters and Field Operating Agencies

Closure or realignment actions taken as of January 31, 2006:

- Conducted BRAC Implementation Planning,
- Drafting Business Plan to facilitate budget allocation,
- Conducted Project Review Board to determine prioritization of military projects.

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed? No

Has a redevelopment plan been agreed to by the redevelopment authority? No

Description of redevelopment plan: None

Quantity of property remaining to be disposed: None

Quantity of property already disposed: None

Federal Agencies requesting property during screening process; and if applicable, the anticipated transfer date and the amount of property to be transferred:

Federal Agency	Anticipated Transfer Date	Acres to Be Transferred
TBD	TBD	TBD

Explanation for any delays in transfer of property: None

Known environmental remediation issues: None

Acreage affected by remediation issues: None

Estimated cost to complete environmental remediation: None

Plans and timelines to address environmental remediation: None

Estimated completion date for all closure or realignment actions: SEP/15/2011

Hoffman 2 Building, Alexandria

Commission recommendation number(s): 132, 142

Recommendation title(s): Co-locate Miscellaneous Army Leased Locations;
Consolidate Transportation Command Components

Closure or realignment actions taken as of January 31, 2006:

- Conducted BRAC Implementation Planning
- Drafting Business Plan to facilitate budget allocation
- Conducted Project Review Board to determine prioritization of military projects

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed? No

Has a redevelopment plan been agreed to by the redevelopment authority? No

Description of redevelopment plan: None

Quantity of property remaining to be disposed: None

Quantity of property already disposed: None

Federal Agencies requesting property during screening process; and if applicable, the anticipated transfer date and the amount of property to be transferred:

Federal Agency	Anticipated Transfer Date	Acres to Be Transferred
TBD	TBD	TBD

Explanation for any delays in transfer of property: None

Known environmental remediation issues: None

Acreage affected by remediation issues: None

Estimated cost to complete environmental remediation: None

Plans and timelines to address environmental remediation: None

Estimated completion date for all closure or realignment actions: SEP/30/2010

Jefferson Plaza-1 Arlington, VA

Commission recommendation number(s): 129, 132

Recommendation title(s): Co-locate Miscellaneous Army Leased Locations; Co-locate Miscellaneous Air Force and National Guard Leased Locations

Closure or realignment actions taken as of January 31, 2006:

- Conducted BRAC Implementation Planning,
- Drafting Business Plan to facilitate budget allocation,
- Conducted Project Review Board to determine prioritization of military projects.

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed? No

Appendix 1

BRAC Environmental Remediation Introduction

The Department of Defense's (DoD's) primary mission is to protect and defend the United States, today and into the future. Sustaining the natural and built infrastructure required to support military readiness is integral to that mission. DoD's natural infrastructure includes approximately 30 million acres of land with accompanying air and water resources, while DoD's built infrastructure provides the military with the space and capability to organize, train, and equip its men and women to perform to the best of their ability.

The Department's environmental programs and related efforts maintain, restore, and improve DoD's natural and built infrastructure, while preserving the environment and protecting nearby communities. DoD addresses legacy environmental contamination through the Defense Environmental Restoration Program (DERP), which applies the environmental restoration process set by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and its implementing regulation, the National Oil and Hazardous Substances Pollution Contingency Plan, to all restoration sites. CERCLA is the primary legal authority governing cleanup activities at all DoD installations and properties, including base realignment and closure (BRAC) installations.

The DERP contains two main program categories, the Installation Restoration Program (IRP) and the Military Munitions Response Program (MMRP) to address environmental restoration. The IRP addresses the releases of hazardous substances, pollutants, and contaminants from past practices on DoD installations. The MMRP addresses environmental and safety hazards from unexploded ordnances, waste military munitions, and chemical residue of munitions remaining from past operations at other than operational ranges, at active and BRAC installations, and formerly used defense sites (FUDS).

This report provides information on DoD's DERP activities at installations affected by the 2005 BRAC Round. Through the DERP, DoD addresses hazardous substances, pollutants, contaminants, and military munitions remaining from past operations at military installations and formerly used defense sites. BRAC DERP sites are at installations where property will be transferred to communities or federal and state agencies. The 2005 BRAC Round affected many installations. While the DERP addresses environmental restoration for all

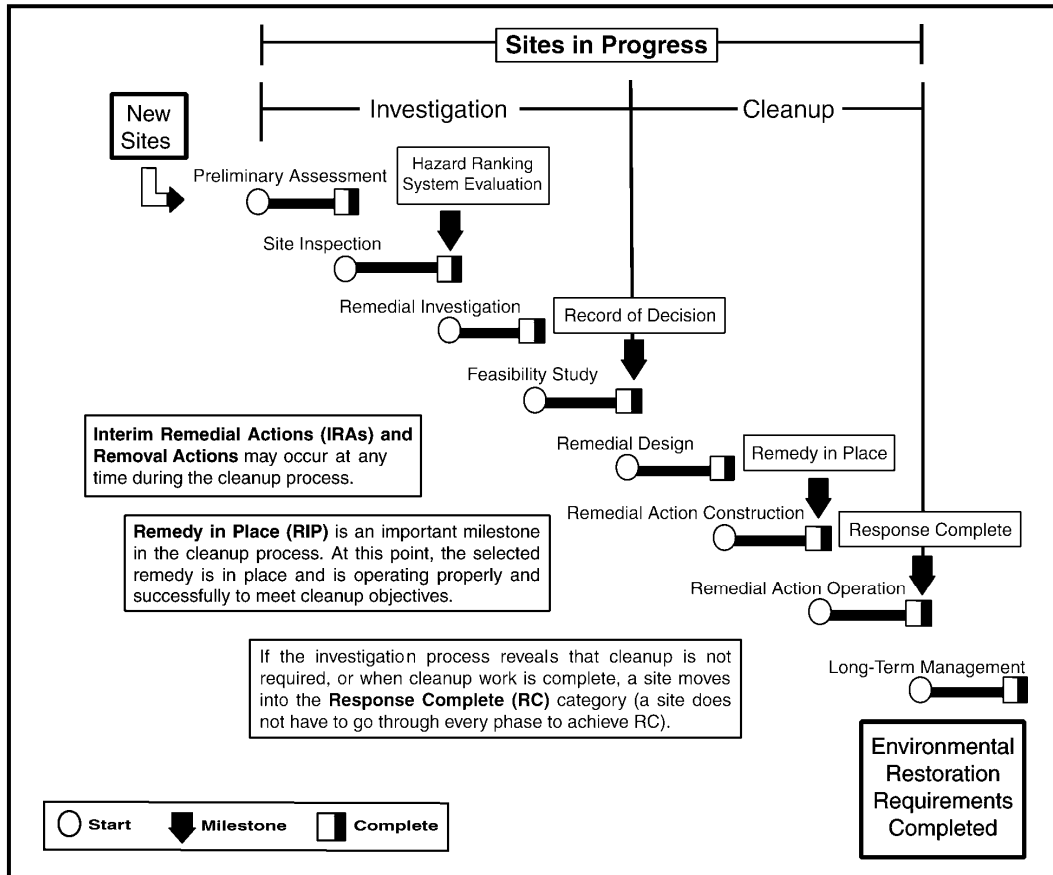

sites at installations slated for closure, not all of the DERP sites at realigning installations are necessarily affected by the realignment action. The report captures DERP environmental remediation efforts at the installation and site level, including installations where 2005 BRAC actions may only affect select sites. For installation level data, specific site level data and associated cost information may also encompass sites at an installation with 2005 BRAC actions that are not specifically closed or realigned in the 2005 BRAC Round because DoD has not completed its reconciliation between land parcels and the DERP sites.

The 2005 BRAC installation and site level tables in this report describe the environmental remediation issue, cost-to-complete (CTC) estimates, and plans and timelines to address environmental remediation that fulfill statutory requirements for Congressional Reporting on BRAC Actions.

Environmental Restoration Status

Since DoD addresses contamination at BRAC installations within the DERP, the environmental restoration process at BRAC installations is similar to the process at active installations and FUDS. The process consists of two main stages: investigation and cleanup. Several phases exist within each of these stages. While some phases may overlap or occur concurrently, DoD generally conducts environmental restoration activities in the order shown in Figure 1.

Figure 1: Environmental Restoration Process and Milestones

Once the presence of contamination is suspected at a site, DoD begins an investigation process. DoD uses the data collected in the preliminary assessment (PA), site investigation (SI), and remedial investigation (RI) to assess the nature and extent of and the potential risks posed by the contamination at the site. Using the investigation data, the Department then conducts a feasibility study (FS) to examine the merits of various cleanup options and determine the best strategy for remediation. The completion of the investigation phase is documented in a Record of Decision (ROD) or an equivalent decision document for the site, which records the results of DoD's investigation at the site; the need for site remediation, if required; the selected remediation strategy; and the remedial objectives for the site.

If the investigation results indicate that remediation is required, the site progresses to the cleanup phases, and DoD begins to implement the selected remedy for the site. The cleanup phases comprise remedial design (RD) and remedial action construction (RA-C), and may include remedial action operation

(RA-O). DoD continues or arranges for operation of the remedy until the remedial objectives for the site, as required under the ROD, are met. There are two important milestones in the cleanup portion of the process. The remedy in place (RIP) milestone marks the point at which DoD has completed constructing the remedy required by the ROD and the remedy is operating successfully. Once DoD meets all cleanup objectives at a site, the site reaches the second milestone, response complete (RC). After the site achieves RC, it may still require some long-term management (LTM) activities to ensure the implemented remedy remains protective.

The Department tracks IRP, MMRP, and BD/DR DERP progress by environmental restoration phase (e.g., investigation, cleanup, long-term management) and risk category. DoD demonstrates program progress as sites move from investigation through the cleanup phases to completion of all environmental restoration requirements. This report contains tables arranged by DoD Component, State, and installation to present various aspects of environmental restoration status. Figure 2 is an environmental restoration status reference guide to the tables contained in this document.

Figure 2: Environmental Remediation Status Table Reference Guide

Environmental Remediation Status

Lists the State, Service, a unique identifier referred to as a federal facilities identification number (FFID), and an installation name.

Indicates the restoration issue by identifying contaminated media (e.g., groundwater, soil). If no issues remain, this column is left blank.

Site Status of BRAC Round 2005 Sites - Closures and Realignments as of EOY FY05 3/29/06

Site Name	Site Type	CTC (\$K)	Investigation Completion (yyyy/mm)	RIP/RC (yyyy/mm)	Program Category	Relative-Risk Site Evaluation	Media / Restoration Issue
California							
AIR FORCE — CA957212450800 / BEALE AIR FORCE BASE					CTC (\$K): \$168,150	Acres Affected By Restoration Issues: TBD	BRAC Action: Realignment
AL588	Air-to-Land	\$1,872	2014/01	2016/01	MMRP	Not Required	
AS030	Above Ground Storage Tank	\$0	1996/11	1999/12	IRP	Response Complete	
CG040	Contaminated Ground Water	\$1,421	2007/03	2009/12	IRP	Low	Groundwater
CW605	Chemical Weapons	\$1,218	2012/01	2014/12	MMRP	Not Required	

Provides the unique DERP site identifier assigned by the Service and site type description that characterizes the type of DERP site.

Indicates the DERP program category of a site as IRP, MMR, or BD/DR.

Indicates the IRP relative-risk site evaluation ranking score of High, Medium, Low, or Not Evaluated (e.g., relative-risk ranking pending). Additionally, sites that do not require a relative risk-ranking because they have a remedy in-place or are not an IRP site are so noted, as well as response complete sites that have completed all work or only have LTM costs remaining.

Cost-to-Complete Estimates

CTC refers to the estimated cost for future cleanup of environmental contamination. It also includes response actions to address unexploded ordnance, discarded military munitions, and munitions constituents at past and present DoD sites. CTC estimates for DoD environmental cleanup projects are used for several purposes including programming, budgeting and execution, and reporting future program requirements. Amounts exclude program management costs not directly attributable to specific sites.

This report contains CTC estimates for all 2005 BRAC installations from Fiscal Year (FY) 2006 to program completion. In some cases, sites that have achieved response complete status have some LTM costs remaining to ensure that the restoration measures remain protective of the environment. Figure 3 is a CTC reference guide to the tables contained in this document.

Figure 3: Cost-to-Complete Table Reference Guide

Cost-to-Complete (CTC)

Indicates the installation level costs anticipated in FY2006 through completion.

3/29/06

Site Status of BRAC Round 2005 Sites - Closures and Realignments as of EOY FY05

Site Name	Site Type	CTC (\$K)	Investigation Completion (yyyy/mm)	RIP/RC (yyyy/mm)	Program Category	Relative-Risk Site Evaluation	Media / Restoration Issue
California							
AIR FORCE --- CA9572124500007 BRAC AIR FORCE BASE				CTC (\$K): \$168,150		Acres Affected By Restoration Issues: TBD	BRAC Action: Realignment
AL588	Air-to-Land	\$1,872	2014/01	2016/01	MMRP	Not Required	
AS030	Above Ground Storage Tank	\$0	1996/11	1999/12	IRP	Response Complete	
CG040	Contaminated Ground Water	\$1,421	2007/03	2009/12	IRP	Low	Groundwater
CW605	Chemical Weapons	\$1,218	2012/01	2014/12	MMRP	Not Required	

Indicates site level costs anticipated in FY2006 through completion.

NOTE: Dollars are in thousands and represent costs attributable to specific DERP sites. Totals exclude management and support costs not attributable to specific sites.

Plans and Timelines to Address Environmental Remediation

For the purposes of this report, plans and timelines for addressing DERP environmental remediation are provided for three restoration milestones.

- Study Phase – MMRP or IRP sites where investigation of the environmental contamination is beginning or still underway
- RIP – An important milestone in the cleanup process that marks the point where the selected remedy is in place and is operating properly and successfully to meet cleanup objectives
- RC – Marks the end of the restoration process. Some additional LTM costs may be associated with sites that have reached RC. These costs are for conducting 5-year reviews to ensure restoration work has been protective of human health and the environment. If the investigation process reveals that cleanup is not required, or when cleanup work is complete, a site moves into the RC category. A site does have to go through every phase of the cleanup process to achieve RC.

Figure 4 is a plans and timeline reference guide to the tables contained in this document. It shows where the investigation completion date and the RIP/RC date is located for the specific DERP sites.

Figure 4: Plans and Timeline Table Reference Guide

Plans and Timelines							
Site Status of BRAC Round 2005 Sites - Closures and Realignments as of EOY FY05							
3/29/06							
Sitename	Site Type	CTC (\$K)	Investigation Completion (yyyy/mm)	RIP/RC (yyyy/mm)	Program Category	Relative-Risk Site Evaluation	Media / Restoration Issue
California							
AIR FORCE --- CA957212450800 / BEALE AIR FORCE BASE		CTC (\$K): \$168,150		Acres Affected By Restoration Issues: TBD		BRAC Action: Realignment	
AL588	Air-to-Land	\$1,872	2014/01	2016/01	MMRP	Not Required	
AS030	Above Ground Storage Tank	\$0	1996/11	1999/12	IRP	Response Complete	
CG040	Contaminated Ground Water	\$1,421	2007/03	2009/12	IRP	Low	Groundwater
CW605	Chemical Weapons	\$1,218	2012/01	2014/12	MMRP	Not Required	

Specifies the year and month that the last investigation activity is actually or planned to be completed for the DERP site.

Specifies the year and month that the remedy is in-place or the response is complete for the DERP site.

NOTE: Once all sites have reached RC, all environmental restoration is complete at the installation except for limited activity relating to LTM.

Appendix 2

Defense Base Closure and Realignment Act of 1990, Public Law 101-510, as amended through January 6, 2006

SEC. 2907. REPORTS

As part of the budget request for fiscal year 2007 and for each fiscal year thereafter for the Department of Defense, the Secretary shall transmit to the congressional defense committees of Congress:

- (1) a schedule of the closure and realignment actions to be carried out under this part in the fiscal year for which the request is made and an estimate of the total expenditures required and cost savings to be achieved by each such closure and realignment and of the time period in which these savings are to be achieved in each case, together with the Secretary's assessment of the environmental effects of such actions;
- (2) a description of the military installations, including those under construction and those planned for construction, to which functions are to be transferred as a result of such closures and realignments, together with the Secretary's assessment of the environmental effects of such transfers;
- (3) a description of the closure or realignment actions already carried out at each military installation since the date of the installation's approval for closure or realignment under this part and the current status of the closure or realignment of the installation, including whether —
 - (A) a redevelopment authority has been recognized by the Secretary for the installation;
 - (B) the screening of property at the installation for other Federal use has been completed; and
 - (C) a redevelopment plan has been agreed to by the redevelopment authority for the installation;
- (4) a description of redevelopment plans for military installations approved for closure or realignment under this part, the quantity of property remaining to be disposed of at each installation as part of its closure or realignment, and the quantity of property already disposed of at each installation;
- (5) a list of the Federal agencies that have requested property during the screening process for each military installation approved for closure or realignment under this part, including the date of transfer or anticipated transfer of the property to such agencies, the acreage involved in such transfers, and an explanation for any delays in such transfers;
- (6) a list of known environmental remediation issues at each military installation approved for closure or realignment under this part, including the acreage affected by these issues, an estimate of the cost to complete such environmental remediation, and the plans (and timelines) to address such environmental remediation; and
- (7) an estimate of the date for the completion of all closure or realignment actions at each military installation approved for closure or realignment under this part.
